Source: To calculate IRR and investment return multiples, CoStar estimates the market value of each brand, as of September 30, 2025, using 10-year historic average commercial revenue and Adjusted EBITDA multiples. The IRR is calculated using the combined investment, estimated market value and the time elapsed since the combined investment was completed, and investment valuation multiples are calculated by dividing market value by the combined investment.

Non-GAAP Financial Measures

For information regarding the purpose for which management uses the non-GAAP financial measures disclosed in this presentation and why management believes they provide useful information to investors regarding the Company's financial condition and results of operations, please refer to the Company's latest periodic report filed with the SEC at www.sec.gov.

EBITDA is a non-GAAP financial measure that represents GAAP net income attributable to CoStar Group before interest income or expense, net and other income or expense, net; loss on debt extinguishment; income taxes, and depreciation and amortization expense.

Adjusted EBITDA is a non-GAAP financial measure that represents EBITDA before stock-based compensation expense; acquisition- and integration-related costs; restructuring and related costs, including certain advisory fees; and settlements and impairments incurred outside the Company's ordinary course of business. Adjusted EBITDA margin represents adjusted EBITDA divided by revenues for the period.

Non-GAAP net income is a non-GAAP financial measure determined by adjusting GAAP net income (loss) attributable to CoStar Group for stock-based compensation expense; acquisition- and integration-related costs, including gains or losses on equity investments acquired in prospective targets and related to deal-contingent financial instruments; restructuring costs; settlement and impairment costs incurred outside the Company's ordinary course of business, and loss on debt extinguishment, as well as amortization of acquired intangible assets and other related costs, and then subtracting an assumed provision for income taxes. In 2025, the Company is assuming a 26% tax rate to approximate its statutory corporate tax rate, excluding the impact of discrete items, to determine Non-GAAP net income for each quarterly period, year-to-date period, and the annual period.

Non-GAAP net income per diluted share is a non-GAAP financial measure that represents non-GAAP net income divided by the number of diluted shares outstanding for the period used in the calculation of GAAP net income per diluted share. For periods with GAAP net losses and non-GAAP net income, the weighted average outstanding shares used to calculate non-GAAP net income per share includes potentially dilutive securities that were excluded from the calculation of GAAP net income per share as the effect was anti-dilutive.

⁽²⁾ The assumed tax rate approximates our statutory federal and state corporate tax rate for the applicable period.

⁽³⁾ Includes the effect of potential common shares, such as the Company's stock options, restricted stock units, and deferred stock units, to the extent the effect is dilutive. In periods with a net loss available to common stockholders, the anti-dilutive effect of these potential common shares is excluded and diluted net loss per share is equal to basic net loss per share. Non-GAAP weighted average shares have been adjusted for these periods to include the dilutive impact.

Use of Operating Metrics and Other Definitions

Operating Metrics

CoStar Group reviews a number of operating metrics to evaluate its business, measure performance, identify trends, formulate business plans and make strategic decisions. This presentation includes Net new bookings. Going forward, CoStar Group expects to use these operating metrics on a periodic basis to evaluate and provide investors with insight into the performance of the Company's subscription-based services.

Net new bookings is calculated based on the annualized amount of change in the Company's sales bookings resulting from new subscription-based contracts, changes to existing subscription-based contracts, and cancellations of subscription-based contracts for the period reported. Information regarding Net new bookings is not comparable to, nor should it be substituted for, an analysis of the Company's revenues over time.
